PROJECTS

Online Grocery Store (2020)

github.com/thutree/ecommerce-ofs
Developed a simulated grocery store website. With a team of 6 other students, we built a website using Bootstrap, PHP, Mysql, Git, and GCP. I worked on the backend, and helped create the cart, checkout, and post order page.

Beacon Robot (2018)

Created a robot that enters a designated area, finds a beacon, turns it off, and removes it from the area. Designed the frame for the motors and arms. The project was coded using the easyC Cortex V4 program.

LED Clock (2017)

Using the sjsuOne board, breadboards, LEDs and switches, my group and I created a clock that featured functions such as a timer, stopwatch, and alarm. The project was coded in C++.
